

Arnold NextG realizes the Safety-by-Wire® technology of tomorrow with pioneers of the drive-by-wire industry - whether on land, in water or in the air. We offer the worldwide unique and multi-redundant central control unit NX NextMotion, which enables a fail-safe and individual implementation. As an independent developer, incubator and system supplier, Arnold NextG takes care of planning and implementation - from vision to road approval.

## We are looking for

# System electronics technician / Electrician (m/f/d)

## Your tasks

### *Research & Development*

- You take over the electrical and mechanical construction, the wiring and documentation of our systems
- You support our development engineers in the planning, implementation and commissioning of customer-specific projects.
- You complete test set-ups and cable harnesses and take care of testing
- You maintain and update the stocks in the inventory control system
- You are responsible for service and complaint management
- You install and set up application software

## Your profile

Apart from a completed apprenticeship as an electronics technician / electrician / electrical installer (m/f/d) or a comparable qualification, you are enthusiastic about technology and love to find unconventional solutions. You have good knowledge in the field of electrical engineering, have experience or are interested in familiarising yourself with the field of automotive electronics and have excellent PC skills? Then we should urgently talk to each other!

## We offer

Together with our team of world-class developers and talented newcomers, you have the unique opportunity to actively shape the future of mobility today. Our fail-safe electronic steering and braking system with active feedback (Force Feedback), which is already being used successfully in mobility for the disabled on the road, makes it possible to dispense with the steering column and thus represents the biggest revolution in 136 years of the vehicle industry. Our globally unique technology not only makes it possible to digitally rethink and redesign vehicle interiors and concepts from scratch, it also offers the possibility of steering any vehicle from anywhere in the world or freely selecting the steering angle and steering force - even as a retrofit solution (logistics centres, ports, etc.). We use motorsport as a development environment with our own team, laying the foundations for the safe autonomous driving of the future. State-of-the-art workplaces, our own mobility campus with training rooms and driving safety centre, short decision-making processes and a high level of project dynamism ensure a varied yet goal-oriented environment. You will find a package of flexible working hours, modern management structures, attractive remuneration, your own area of responsibility and attractive in-house employee benefits (fitness studio, health budget, skills court, five training sessions, shock wave, ultrasound, electrotherapy and laser therapy). Our physiotherapy and foot care services round off the package.
